One Man, One Lady and

Denies the Charge Peonage In the Country

By Robert H. Murray =

VII "Mexico In Its Centennial '

stock of personal experiences in dealigo. The Mexican laborer, 299 out of every 1000, possesses within himself none of the ambition or impeling forces the laborers were paid at the rate of 50 cents silver a day. Being a New Englander, with reminiscences of a year of college settlement work comparareconcile his conscience with the fact that human beings directly under his charge were straining dollar in United States money.

So, without saying anything to the other Americans on the job, who had been in Mexico longer than I had, I raised the wages all around from 50 can peon. self that I had done a humane act, to say nothing of salving my New England ear instruction of salving my New England conscience. When they heard of it the other Americans laughed and said, so much work daily out of so many hands face to face with the biggest sort

Raising a Peon's Pay.
"What was the result? Inside of two weeks, instead of having 250 peons working like beavers for six days a week, which was necessary in order to keep the output of the mine up to the mark, I had 250 men working three

"Right there I learned a great lesson." I realized that the harder he was workand simple. He will not save his mon-ey, if he earns more than he actually needs to support himself and his fam-The rest goes in gambling and intoxicants. My men were better off, and we got more work out of them, at 50 cents a day than on \$1. They reasoned it this way; If I can make enough to live on by working three days a week, what is the use of working six?" We went back to the 50 cent basis and had no more trouble."

Ambitionless Laborer. This story brings clearly into per spective one basic fact which must be reckoned with by anyone who essays an investigation into labor conditions, and

MASS OF HUMOR

Suffering Simply Indescribable — Had to Scratch Till Blood Ran — Health Undermined from Lack of Sleep - Gave Up Hope but

CUTICURA FREED HIM FROM SKIN-TORMENT

"About seven years ago a small abra-

on my right leg just above my ankle. It fritated me so that I began to scratch it and it began to spread until my leg from my ankle to the knee was one solid scale like a scab. The irritation was always worse at night and would not allow me would not allow me to sleep, or my wife either, and it was completely undermining our health. I lost fifty pounds in weight and was almost out of my mind with pain and chagrin as no matter where the tritachagrin as no matter where the irritation came, at work, on the street or
in the presence of company, I would
have to scratch it until I had the blood
running down into my shoe. I simply
cannot describe my suffering during
those seven years. The pain, mortification, loss of sleep, both to myself and
wife is simply indescribable on paper
and one has to experience it to know
what it is.

"I tried all kinds of doctors and
remedies but I might as well have

remedies but I might as well have thrown my money down a sewer. They would dry it up for a little while and fill would dry it up for a little while and fill me with hope only to break out again just as bed if not worse. I had given up hope of ever being cured when I was induced by my wife to give the Cuticura Remedies a trial. After taking the Cuticura Remedies for a little while I began to see a change and after taking a dozen bottles of Cuticura Resolvent, in conjunction with the Cuticura Soap and Cuticura Ointment, the trouble had entirely disappeared and my leg was as fine as the day I was born. Now after a lapse of six months with no signs of a recurrence I feel perfectly safe in extending to you my heartielt thanks for the good the Cuticura Remedies have done for me. I shall always recommend them to my friends. W. H. White, 312 E. Cabot St., Philadelphia, Pa., Feb. 4 and Apr. 13, 1909."

An Advantage

mining man recently told me this story, which give dignity and fiber to our and defy his creditor, be cannot be labor in the United States and makes forced to return to the plantation. to take charge of a mine in which he owned a large interest. He found that backbone of the nation. The Mexican laborer does not work of his own valition or initiative. He requires to be driven to it. He works because he must eat. Having striven to the extent is no guarantee that he will not slip whereby his bodily requirements are away again, and put the planter to exprovided for by the few pesos weekly tra expense. The third course open derived by the sweat of his brow, he for the planter is to proceed under the declares a truce with work if he is almuscles and bowing their backs lowed to, and loafs until his peckets 16 hours daily, six days in the week, are empty, and his stomach grumbles for the equivalent of a quarter of a for lack of food. He owns no land. He pays no monthly instalments to a "It didn't seem right," he said. "The mine was prosperous, and we could easily afford to pay the peons what I considered was a fairly decent wage. I flattered my- vidual problem as far as he is concerned, but it brings the planter, the

Tropic Labor Conditions.

It is particularly toward labor conditions in the tropics of Mexico that of late attention has been drawn by various writers. They have combined to days a week and loafing four. Even when they worked, they were away below par, because of the after effects and oppression of labor. It is unques-of overindulgence in pulque while they esentation, if not unadulterated mendacity, has tinctured these reports Half truths and isolated instances have ed and the less he was paid, the better | been ser up as illustrating conditions it was for the peon. His wants are few | which are declared to be general. With as much reason could the recent exposes of peonage cases in Texas and outrageous treatment of prisoners in the convict camps of Georgia be elevated to the dignity of typical examples of labor conditions in the United States. Peonage, so far as its essential ele-

nents go, has an important part in the economical life of Mexico. But peonage is not recognized, sanctioned nor blinked at by the Mexican law, or the authorities. If it is not erring on the side of truth to nominate the term "peonage" as descriptive of the general conditions under which a majority of the laborers in Mexico earn their bread, it must in justice be asserted that it is, for the most part a "peonage" that comprehends no involuntary service and entalis no injustice upon the laborer. Peonage and the law severed partnership with the passing of Mexico from the domination of Spain. But the printeristic example of the reluctance of the Mexican peon to desert the ways of his forefathers for those dictated by an enlightened comprehension of the relations between man and his

Under the Spanish rule in Mexico, a nan could mortgage the labor of his hands to a planter or a hacendado un-til he had paid back the money ad-to the prisons, pay the fines of pickwas the care of the planter that the laborer, once in his debt, should never be allowed to get out. Sons were liable for the debts of their fathers, and so a system of virtual slavery was set up. It is a question if the peon suffered materially, or was deprived of any of

the comforts or pleasures of life, through the operation of the system. Naturally, subservient, dependent, without ambition or initiative, life to him meant nothing save work, a sufficlent amount of food, a few clothes, a shelter for his head, and the intermit tent delights of an occasional flests. Left to his own devices, lack of the power to properly shape his destinies would probably have condemned him to a hand to mouth existence, with nothing assured and everything precarious. But by placing the responsibility for his food, clothing and shelter upon the planter who loaned him money, the peon ceased to worry his head over the material things of life. Tolling for his master assured him of returns at least as ample, if not greater, than those which would have accrued to him had he kept his labor free.

Imprisonment for Debt. Modern Mexican law does not coun-tenance imprisonment for debt, or lay upon the peon the necessity of working out the amount of his advance money. should he elect to evade the obligation

If a law could be enacted and rendered effective, wherby the giving of advance money to laborers would be forbidden, what is left of the old peonage system would be dealt a death But the custom of demanding and receiving advance money is so firmly fixed in the pe on's scheme of things, that he will not engage to work for a stated period on a plantation unplaces in his hand a sufficient number of pesos to enable him to enjoy a grand

"blow out" before departing for the scene of his labors. In return for the money advanced. the peon signs a contract. Excepting as a moral force, the contract is not worth the paper upon which it is writ-ten. Suppose the laborer owes \$56. He works a week, and decides that he will try to evade the debt. He runs away. The planter can do one of three things. He can let the man go, and charge his account up to profit and loss. He can

Mexico, D. F., April 9 .- From his the socalled "peonage system" in Mex-; pursue him and bring him back to the be executed between the laborer and interest in the matter to make a stand sible for the debts of runaways.

No Law for Peonage. There is no law upon which the planter can call. The costs of the pursuit are charged up to the runaway, if he is caught and returned, but there

This costs money, and the judgment is worthless. The peon is worth what he stands in, his hat, sandals, cotton shirt and trousers. He has no lands aging them to shirk their lawful debts or stock, bonds or jewelry. At all points and become fugitives. The jefe saw tom in Mexico, that year after year, the the necessity of getting it off, will hand out to the improvident and irresponsible come by. Much of it is inferior. Figure 2 and labor contractors will bid and if a man shows an indication of ers and labor contractors will bid leaving before his account is worked leaving before his account is worked out, they warn the overseer, and we out, they warn the suspect. The re-Much of it is inferior. Plantof 10, does not really need the advance money. Its utility to him is merely that of a means of saturating himself stand in about as much need as an au-tomobile does of a hitching strap.

The Planter's Precaution. The planter can hardly be blamed for taking such precautions as seem to him to be proper to insure the presence of the peen on his plantation until he has worked out his debt. On most plantations the survellance to which the peons are subjected is slight. The laborers come from a distance, and planter places his main reliance for the security of his contract laborers upon the difficulties that beset a penniless fugitive on a long tramp through a densely jungled, thinly populated country. Besides, it takes a degree of "gumption" to essay a flight, and the peon has not a suspicion of this moving and inspiring quality in his make-

But with the "enganchado" labor different tactics are pursued. Generally speaking, "enganchados" are the off-scourings of the cities and towns, drunkards, broken men, thieves, idlers, the riffraff, who are gathered together by labor contractors, and shipped in squads to the tropics, where labor is urgently needed.

The Labor Contractor.

A planter is unable to get together enough men to work his crop. In his desperation-for a planter must be hard pressed who is willing to take on en-ganchados—he engages a labor contractor to send him 50, 60 or 100 men. The contractor accepts no responsibility for quality. He gets so much per man regardless of the man's efficiency. Anything that walks on legs is meat to the contractor. If he is short a few men vanced to him by his employer, and to pockets of petty thieves, get their gain which he signed away his liberty. names on a contract and ship them to the plantations.

The planter usually takes no chances with the enganchado. He is morally worthless, oftener than not, and he has not the slightest compunctions about escaping and beating the planter of not only his advance money, but what it has cost him in contractor's fees and railroad fare. So at night the enganchados are herded into barb wire enclosures, and guarded. The result is that most of them, willy nilly, are compeled to stay on the plantation until they have worked out the last centavo of their debt.

Inefficient Labor. Enganchado labor is the worst and least efficient in the country. Most of the enganchados are city men, who have never had a machete or an agricultural implement in their hands. They are the veriest greenhorns on a plantation. The bulk of them are lazy. Manifestly it is the interest of the planter, in dealing not only with the enganchados, but with the ordinary peon, to feed them well, and to make them as contented as possible. A well fed, contented man is an asset, for he will work. But if he is starved or illtreated, his earning capacity becomes lessened. It must be remembered that all classes of labor in Mexico are assets only so long as they can or will do their tasks.

Selfish considerations, alone, in the absence of any higher or more humane motive, would impel the planter to handle his men so as to get the most labor possible out of them. For this reason is fair to assume that reported instances of peons or enganchados having been starved or beaten to death by brutal masters are exceptional. I have visited plantations where both ordinary contract labor-peons-and enganchados, were employed.

On each place there was a white washed hut, with a barred window, growth and development, which served the purposes of a jail. If On a Broad Ba peon or enganchado refused to work, or made trouble, he was promptly lock-ed up and fed on limited rations for a upon the labor. They are prompt to investigate and set in motion the ma-chinery of the law to punish planters or overseers who maltreat laborers.

Holding "Contract Laborers." he is one of the very few Americans who has made a success of agriculture in the Mexican tropics-told me of a method devised by him whereby he put a stop to escapes among his contract laborers. Incidentally, this case illustrates how keenly the Mexican authorities look after the legal rights of the peons who contract themselves to planters. This man conceived the notion of incorporating in the printed form of contract which the law specifies shall

A NOTRE DAME LADY'S APPEAL

To all knowing sufferers of rheumasciatica lumbagos, backache, pains in the kidneys or neuralgia pains, to write to her for a home treatment which has repeatedly cured all of these tortures. She feels it her duty to sens it to all sufferers FREE. You cure yourself at home as tho sain is will testify—no change of climate being necessary. This simple discovery banishes wie acid from the blood, loos-ens the stiffened joints, purides the blood, and brightens the eyes, giving elasticity and tone to the whole system. If the above interests you for proof address Mrs. M. Summers, Box R. Notre Dame, Ind.

plantation, not by force, however, but the planter, a clause by which all of his by coercion. If the peon has sufficient employes should become jointly respon-

If a man fled, owing money to the planter, 25 percent was charged to the overseer, 10 percent to the foreman of the squad to which the runaway belonged, and the remainder to the rest of the laborers in the man's squad. How the Plan Worked. "That was three years ago," said the planter, "and not a man has run away from my place since. The men watch each other. If a man is planning to out to the improvident and irresponsible escape, his companions know it. Forpeons millions of pesos in advance merly they used to keep quiet and let money. Labor is scarce and hard to him go. Now, in order to save themcome by. Much of it is inferior. Plantagainst each other for men, out they warn the overager, and back and forth sums ranging from the sum out they warn the overager, and the sum out they warn the overager, and the sum of the place an honest man, with his debt worked out and a receipt in full in his with liquor, or purchasing gewgaws hand. Some of them stay on, and other for himself or his wife, of which they stand in about as much need as an autake pride in the fact that they are free men, that they owe nothing. Planters complain that labor condi-

tions in the tropics are demoralized. With unaulmity they place the blame upon the American plantation companies and their American managers. Labor in the tropics used to be cheaper, and more efficient, at 18, 25 and 50 cents a day. The Americans came, taking up huge tracts of land. Most of the American companies were stock selling enterprises. They sold millions of dollars worth of stock, on the instalment plan, and thus amply equipped with funds, began the task of converting the jungle into productive fields. Unfortunately, the management of a majority of these stock company plantations was wasteful, inefficient and often downright dishonest. They wanted labor and were willing to pay almost any price for it. They bulled wages, and held before the peons the lures of \$1 and \$1.25 a day, with better food than they had ever eaten before

Mistaken Idea of Laxity. Coupled with this pampering of the volume. eons was a mistaken idea of laxity, so far as long hours of toll and a maxiand to economize, for they were obliged ernment adopts some sort of a po leaving their stockholders wailing and, only too rarely, the rascals who plundered the treasuries in jall, much labor was

released. But high wages and too len-ient treatment had had their effect up-

"After a year on one of these get-rich is honestly trying to solve the labor pany. "Prosperity had spoiled them They wouldn't buckle down and work and they were not satisfied with a fair, legitimate wage. Conditions will readjust themselves in time, but mean-

Criticism of System. Both in theory and practice the labor situation in Mexico may ge criticised ad-versely. But when one takes into consideration every fact bearing upon the situation, the prime necessity of utilizing to the utmost such labor as the country contains, the temperamental dement with things as they are, it is difenacted today, prohibiting labor con-tracts and forbidding planters and contractors from advancing money to se-cure the labor of men, their enforcement would reduce the supply and efficiency of labor in the republic by at least 50 per cent. And the general condition of

Generally speaking the supply of la-bor in Mexico has thus far been found sufficient to keep pace with the prog-ress and development of the country. At present there seems to have been struck about an equal balance between demand and supply Patters conditions unused to manual labor and

No Incentive to Emigrate. This being so, they have no incentive The European laborer, mum of exertion was concerned. They spoiled the peons. This worked a hardship upon the planters who were trying to struggle along on small capital here until wages are raised, or the government. to compete with the wealthy and ex-travagantly managed companies in or- to settle in the country, having before der to obtain help. demand and supply. Future conditions are problematical. But it seems reasonable to assume that, with the awakening of interest in agricultural enterprises, the bringing of immense tracts of land under cultivation through the prostered by the government, the opening of new mines and the organization of all orts of industrial ventures, the time is fast approaching when labor will be come scarcer and more difficult to ob-tain. Immigration of the right kind offers a possible solution for meeting the conditions that impend. Efforts at bringing contract labor to Mexico have, as a rule, not proved successful. Chinese, Japanese and Italians have been tried. Usually the men imported have been of an undesirable sort, the rag-tag and bob-tail element from the cities, ambition or purpose. Successful farm-ers or steady reliable workers are apt to prosper and be contented in their own countries

to press their fortunes in an unknown land. White labor the sturdy, industrious German, Russian, Pole, Hungarian or Hollander, such as passes through Ellis Island by the thousands, sees nothing in Mexico at present to attract him. Wages are higher in the United States, and also in the Argentine, to which latter country European immigration recently has trended in great matter how frugal he may be, cannot compete with the ambitionless peon who presented in the United States, Canada or the Argentine.
